Summary

Passionate new graduate in Computer Science seeking an entry-level information technology opportunity

Education

Bachelor of Science, Computer Science
California State University, Long Beach

Graduated: May 2023

Projects

- **LetsPlan**
 - Created a collaborative event scheduling app using Dart, Flutter, and Firebase
 - Engineered a database using Firebase Firestore, in which data about users and user events was read, written, and queried
 - Gathered weather data by making requests to the GeoLocator API and the OpenWeather API
 - Integrated the Google Routes API to calculate optimal departure time for an event
- **Bastille Infini**
 - Developed a third-person shooter game set in space, alongside a team of five students of different game development disciplines during a semester-long project.
 - Programmed enemy AI, player movement, and object interaction using C#
 - Formulated several intuitive user interfaces

Relevant Coursework: Operating Systems, Computer Architecture and Organization, Introduction to Networks and Distributed Computing, Object Oriented Programming & Data Structures

Skills

- **Languages:** Java, C++, C#, .NET Core, Dart
- **Operating Systems:** Windows, Linux, macOS
- **Version Control:** Git, GitHub, Sourcetree
- Troubleshooting
